Attn: Bill Turner

Dear Bill:

It has been a real pleasure working with you over the past 6 months in regards to the air quality concern at Biddeford High School. I found you to be cordial, knowledgeable, honest and factual. You were willing to educate us on plans such as containment, moisture intrusion and cleaning. You worked closely with Brian Phinney, Phil Radding and Ledgewood Construction Company. You were willing to communicate with these people by email, telephone and meetings. You were open to meeting with them whenever necessary.

You were very professional in making us aware of the conditions of the high school and what needed to be done to assess the situation. In addition, you were flexible and willing to take the time to answer questions of concerned citizens, staff members and students. The presentations before the Biddeford School Committee were well thought out and very effective.

I look forward to working with you as we conduct the containment check-ups at Biddeford High School. Thank you for providing services in a very professional manner.

Sincerely,

A handwritten signature in cursive script, appearing to read "Sarah Jane Poli".

Sarah-Jane Poli
